## Grant Euroflame Kitchen/Utility Range

### **Dimensions (mm)**

Grant Euroflame 15-21 and 21-26 Utility and System

Grant Euroflame 26-35 Utility and System

## Condensate Removal

The condensate trap is now factory fitted within the white case on Grant Euroflame Utility boilers, but can also be positioned externally if preferred.

## Flueing

Utility models are compatible with all of Grant's EZ-Fit flue options and capable of being flued from the top, rear, left or right hand sides of the appliance.

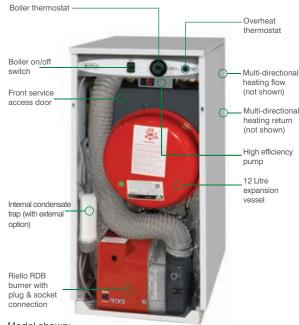

### Sealed System Models

Grant Euroflame Utility boilers are also available in sealed system versions. These include a factory fitted expansion vessel, filling loop, pressure gauge, automatic air vent, pressure relief valve and high efficiency circulating pump, enabling boilers to be installed without the need for a feed and expansion tank in the loft.

## **Flue Systems**

All Grant Vortex oil-fired boilers are supplied for connection to either a 'stainless steel' conventional flue, or one of Grant's EZ-Fit flue options. The flue systems are available as low level, high level or vertical kits, for internal and external applications, and even as unique EZ-Flexi packs designed to enable condensing boilers to utilise an existing chimney. All our EZ-Fit flues carry the CE mark of approval, are adaptable to any installation, and deliver excellent value for money.

## **Typical Hot Water Performance**

26kW Combi\*\* 17 litres per minute at an average temperature of 50°C. Recovery time 4 minutes approx. Based upon 100 litre draw off.

36kW Combi\*\* 20 litres per minute at an average temperature of 50°C. Recovery time 3 minutes approx. Based upon 100 litre draw off.

#### **Mains Water Pressure**

Minimum: 2.5bar (36psi). Maximum: 8bar (115psi). \*\* Hot water flow rate is dependent on mains pressure available. Figures based upon an incoming mains water temperature of 10°C.

## Fuel

All burners are supplied factory set a the stated output for use on standard grade Kerosene – Class C2. Grant Condensing Boilers are not suitable for use with Class D gas oil.

## Installation

Installation must comply with the current Building Regulations. Comprehensive technical information can be found in the installation manual, suppllied with every boiler.

## Guarantees

The unique heat exchanger on the Grant Condensing Boiler is covered by a 5-year guarantee. All other component parts of the boiler are guaranteed for 2 years from the date of purchase (excluding consumable items, labour, handling or shipping), subject to being installed in accordance with the manufacturer's instructions. On completion of the installation all Grant Condensing Boilers must be commissioned and the boiler passport returned to Grant Engineering for registration.

### After sales service

For peace of mind, all Grant Condensing Boilers are backed by a national network of service engineers.

In the unlikely event of a problem occurring, your installer should telephone our customer service department on: **(057) 9120089.** All images for illustration purposes only.

### **Grant Vortex Mag-One Magnetic Filter**

The Mag-One (Part code: VM01) provides innovative protection for your Grant Vortex oil-fired boiler and central heating system up to 36kW. Using a simple to install, triple action filtration design, the Mag-One filters magnetite and non-ferrous debris from central heating systems with a 12000 gauss neodymium magnet.

This brochure is accurate at the time of printing but as Grant Engineering has a policy of continual improvement it may be superseded. We reserve the right to amend specifications without prior notice. The statutory rights of the consumer are not affected.

All products manufactured under I.S. EN ISO 9001.
